Calle Flygare Theatre School, Stockholm 2016 – 2018
Uppsala University, Bachelor's degree in economics 2012 – 2015
Adelphi University, New York, USA, economics 2011 – 2012
Dubai American Academy, United Arab Emirates, International Baccalaureate Program 2009 – 2011
Kungsholmens Gymnasium, Stockholm, Pre-International Baccalaureate Program 2008 – 2009
Cairo American College, Egypt, Middle & High School 2006 – 2008

Work experience

Front-end intern, at Sharpness, Stockholm
(May 2023 – ongoing)

I am working with a registration system, used by around 400 users over four organisations. The team is upgrading the legacy Scala code to Java with Spring Boot, and a completely new front-end in Agular and TypeScript. Another focus area is testing, such as **end-to-end tests** and regression testing.

I am currently the sole front-end developer in a team otherwise consisting of Java developers in an agile team. Together they work closely to meet the requirements set by the product owner.

Front-end Project, at Baemingo, Stockholm
(May 2023 – ongoing)

Baemingo is a checkout system for restaurants, bars, cafés, and retail, that are planning to release their new global website.
My responsibility is to review the code, and website before it can go live. The website is built with React and jQuery and the CMS system *Contentful.* I will also fix bugs discovered and create translator functionality.

Front-end intern at Stryda (Ex G-Loot), Stockholm
Oct 2022 – May 2023

My first project involved migrating Stryda's internally built admin system from JavaScript to **Typescript**, including replacing depreciated dependencies, refactoring, and building new functionality - such as API CRUD operations to get or change user data.

My second project was to create a back-office for Stryda's flagship product. Before the Business Intelligence team manually worked in Swagger with JSON data as configuration. Now the BI team have automized weekly configuration work, which has **reduced manual labour from hours to minutes**, and potential human errors. The project also allows outside teams to work with the product.

As the team's problem solver, I managed to solve an issue where two different production environments were deployed on the same docker image. Working together with the DevOps team, I have learned much about **GitHub actions and workflows, pipelines, and Docker**.

During my time at Stryda I have been responsible to lead daily stand-ups, backlog refinements, sprint retros and create new tickets for the team.

Board Member at FC Krukan, **Stockholm**
March 2022 – Present

Elected as President 2023. Built a [RSVP'ing app](#) for the team's matches. Please check it out! [Github repo](#)

Note-taking Support at Medieinstitutet, Stockholm
Sept 2021 – Present

Collection & Trading at Ikano Bank AB, Stockholm
Feb 2020 – Sept 2022

My primary responsibility in this role is to minimize financial loss and mitigate risks within Ikano Bank's B2B leasing segment for clients that are insolvent, in bankruptcy or under reconstruction.

I negotiate with clients, vendors, subcontractors, and legal advisers. I analyse and perform research, as a basis for the negotiation on how to reach the best arrangement for the parties involved.

Sales Manager at Coop Sverige AB, Stockholm
May 2019 – Jan 2020

Worked part time between 2017 and 2019 and then promoted to second in line behind the store manager. My areas of responsibilities included controlling purchase orders, analysing sales performance, supplier relations, reviewing invoices, cash out, delegating tasks, and creating the work schedule for all employees.

Freelance Actor, Sweden
2018 – 2019

Not only have I acted, but also directed, been part of creative groups, written and edited scripts. Most notably I have a role in Richard Holm's **TV-series Heder**, which aired during the fall of 2019. I have acted in plays as well as taken additional responsibilities to aid other actors and setting the stage.

Leasing Administrator at Upplands Motor AB, Stockholm
Jun 2015 – Oct 2017

Responsible for the administration of leasing deals, payment of general agent cars, current record of accounting, and auditing invoices. Once I started my education at Calle Flygare Theatre School, Upplands Motor offered me to work part time from home and I also spent an additional summer working in their office.
